OUTLOOK AND STRATEGY

PCOMP declined -1.74% MoM, on the back of substantial foreign selling in May as overseas portfolio funds continue to shift out of ASEAN in favor of China. As of end May, around USD592 mn have already left the local bourse. Moreover, investors also took profit on account of unexciting 1Q15 corporate earnings, stretched valuations and slower GDP reading.

One notable event for the month was the MSCI rebalancing which saw GTCAP's inclusion in the MSCI Philippines Index, with an initial weighting of 3.88%. GTCAP share price advanced strongly as investors started to accumulate the stock ahead of the implementation date.

Meanwhile, the BSP kept the reserve requirement of banks, over-night borrowing rate and Special Deposit Account (SDA) rate steady at 20%, 4%, and 2.50%, respectively. The BSP's move was made on the back of a very benign inflation outlook and favorable growth prospects. Headline inflation eased to a 20- month low in April to 2.2% from 2.4% in March due to stable food, fuel and electricity prices.

It was generally a quiet month for local bonds as investors remained on the sidelines due to lack of any fresh leads. The imminent hike in U.S. interest rates has kept investors, especially those trading fixed income securities like ourselves, in the defensive. We have positioned our portfolio in the short end of the curve, with a duration of only 1.1 years.
