**INVESTMENT OBJECTIVE AND STRATEGY**

UCMF seeks to prevent loss of principal at all times by investing in deposits in local banks. It also aims to surpass its benchmark which is the HSBC Money Market Index. This should not be construed, however, as a guarantee of yield.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UCMF is suitable only for investors who:
  - have a risk profile of conservative based on the results of the accomplished Client Suitability Assessment Form;
  - has an investment perspective which is short term in nature and willing to put all his/her/their money only in time deposits;
  - are willing to forego the higher long term returns generated by riskier investment; and
  - understands the risks of investing in products which are non-deposit, non-bank and with no recourse to the Bank.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a deposit issuer's failure to pay principal and/or interest in a timely manner on deposit instruments.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

- **THE UITF IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS AND FLUCTUATIONS ONLY**
- **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE**

## STATISTICS

Weighted Ave. Duration	N/A
Volatility, Past 1 Year*	0.03%
Sharpe Ratio**	0.46%
Information Ratio***	N/A

\* Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time.

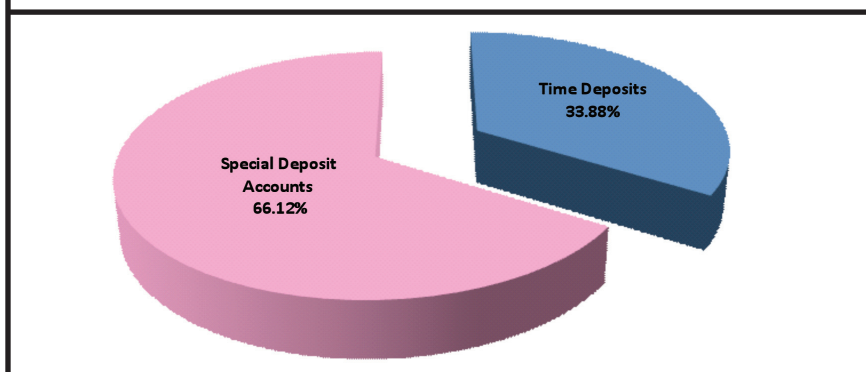

\*\* Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

\*\*\* Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

## OTHER DISCLOSURES

### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper and with UCPB Savings Bank, a wholly-owned subsidiary of the Bank, amounting to P207k and P80mn, respectively, which were approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

### OUTLOOK AND STRATEGY

Inflation in March eased by 10bps to 2.4% from 2.5% in February. This was principally caused by the drop in food prices and faint decline in utilities and transport. The BSP revised downwards its inflation forecast to 2.2% for 2015 but kept 2016 unchanged at 2.5%.

BSP kept its key policy rates, Special Deposit Account rates, and reserve requirements unchanged. This is in anticipation of manageable inflation and strong domestic demand conditions.

The overnight borrowing and overnight lending rates were maintained at 4% and 6%, respectively. Interest rates on the Reverse Repurchase, Repurchase, and Special Deposit Account facility as well as the Reserve Requirement ratios were also kept on hold.

The Monetary Board's decision was based on the expectations that inflation would be well-anchored, even as uneven global growth poses upside risks to commodity prices. The monetary authority would rather preserve its pre-emptive moves since the economy does not need additional stimulus due to robust domestic demand conditions and higher public spending.
