OUTLOOK AND STRATEGY

PCOMP declined -1.74% MoM, on the back of substantial foreign selling in May as overseas portfolio funds continue to shift out of ASEAN in favor of China. As of end May, around USD592 mn have already left the local bourse. Moreover, investors also took profit on account of unexciting 1Q15 corporate earnings, stretched valuations and slower GDP reading.

1Q GDP grew by 5.2% YoY, way below the consensus forecast of 6.6% and govt. guidance of between 7% - 8% growth for the entire year. The underwhelming performance was mainly due to govt. underspending especially in public construction, and weak exports which only manage to grow by a mere 1% YoY.

One notable event for the month was the MSCI rebalancing which saw GTCAP's inclusion in the MSCI Philippines Index, with an initial weighting of 3.88%. GTCAP share price advanced strongly as investors started to accumulate the stock ahead of the implementation date. Meanwhile, with share prices falling, yield plays (such as Holcim, Lafarge, PLDT, Meralco, GMA Network, DMC Holdings, Aboitiz Power, Globe Telecoms, Manila Water, Union Bank and Semirara) are again attracting the attention of investors.

We have slightly increased our cash position as we believe that the market is still susceptible to further correction.
