INVESTMENT OBJECTIVE AND STRATEGY

UPBF aims to provide its participants an alternative long-term investment outlet through investments in high quality and credit worthy instruments such as Government Securities and Deposits, Negotiable Certificate of Deposits, and Non-Negotiable Certificate of Deposits with the UCPB and other banks. It also aims to surpass its benchmark which is the HSBC Local Bond Index. This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UPBF is suitable only for investors who:
 - have a risk profile of moderate based on the results of the accomplished Client Suitability Assessment Form;
 - are willing to invest in other fixed income instruments (such as government securities, corporate bonds, etc.) and willing to accept some amount of risk on principal and earnings, with unlimited upside and downside on yields; and
 - wants to exceed the returns of a time deposit over the long term, and willing to accept the returns that are from time to time lower than time deposits.

OUTLOOK AND STRATEGY

The Bangko Sentral ng Pilipinas (BSP) reported that the personal remittances from overseas Filipino workers (OFWs) went up by 4% YOY to US\$2.078 billion in February this year. The main driver was the US up by 11.5% YOY and the Middle East up by 4% YoY.

Inflation for the month of March slowed down to 2.4% from 2.5% in February due to easing food prices and other miscellaneous items.

It was a quiet market in the local bond market as investors stayed on the sidelines due to lack of fresh leads. We saw some buying interest but not as high as in previous months. Toward the latter part of the month, however, we saw some slight sell-off across the curve due to uncertainties surrounding the upcoming implementation of the Non-Restricted Trading that will start on May.
