OUTLOOK AND STRATEGY

Headline inflation slowed further in June to 1.2% compared to 1.6% in May on lower oil and electricity prices and sufficient food supply. Domestic liquidity increased by 9.3% in May on continued demand for loans. The local bond market was generally quiet as investors remained cautious on account of the imminent hike in US interest rates. Moreover, the planned bond exchange scheduled before the end of the year has sidelined investors for the moment pending the release of further details.

Our corporate and sovereign bond positions remain short in terms of duration in order to minimize portfolio volatility.
