INVESTMENT OBJECTIVE AND STRATEGY

UBF seeks to provide long-term capital appreciation and income by investing in a mix of equities and fixed income securities. It also aims to surpass its benchmark which is the composite return of the Philippine Stock Exchange Index and the HSBC Local Bond Index. This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UBF is suitable only for investors who:
 - have a risk profile of aggressive based on the results of the accomplished Client Suitability Assessment Form;
 - are seeking a simple way to achieve a diversified holding of stocks and fixed-income investments; and
 - willing to accept moderate fluctuations in unit prices.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.
- Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities).
- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

STATISTICS

Weighted Ave. Duration	2.22
Volatility, Past 1 Year*	5.90%
Sharpe Ratio**	0.00%
Information Ratio***	-0.07%

* Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time.

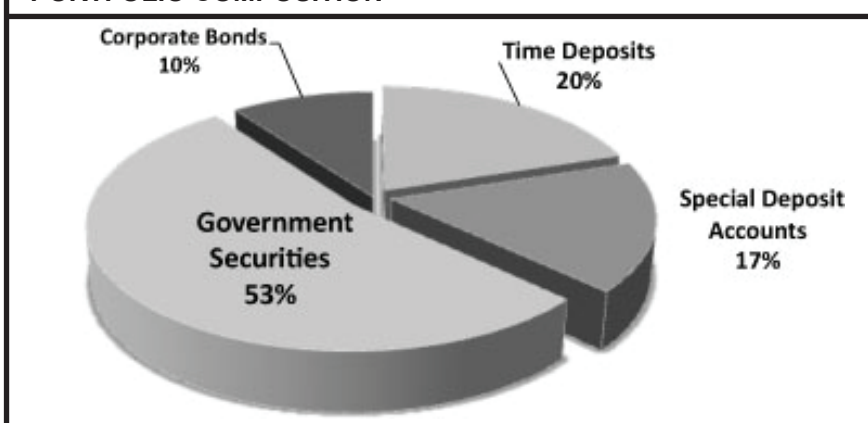

** Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

*** Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper amounting to P31k which was approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

Despite slower growth, the Monetary Board opted to keep its key rates unchanged. The MB believed that there is underlying strength in the economy and that current rates are still appropriate. The overnight borrowing rate, reserve requirement of banks and SDA rate stayed at 4%, 20% and 2.50%, respectively.

Remittances from Filipinos abroad grew 5.8% in June to US\$2.4bn, the largest monthly inflow in the last six months. Remittances should increase by 6% this year to around USD28.6bn.

The economy expanded by 5.6% in 2Q15, slightly faster compared to the 5.0% growth achieved during the previous quarter. The 2Q growth was driven by domestic demand particularly household spending and construction. We expect govt. spending to accelerate in the coming months. We believe that infrastructure spending will be the main vehicle for the government's pump priming activities.

Bond yields weakened further as investors remain cautious on the back of the looming hike in U.S. interest rates and the slowdown in China. While there is a lively debate as to when the Fed will hike rates – whether in Sept. or in Dec. – the almost consensus view is a hike within the year.

Our corporate and sovereign bond positions remain short in terms of duration in order to minimize portfolio volatility.
