OUTLOOK AND STRATEGY

The country's economy expanded by 6.0% in 3Q 2015 compared to the revised 5.8% growth in 2Q of this year. It was the strongest performance in the last three quarters. Govt. consumption and public investments were the key drivers for the quarter.

November inflation came in at 1.1%, from a record of 0.4% in October on higher food prices. Inflation averaged 1.4% for 11M 2015. OFW remittances reached USD22.8 bn for the 1st 10 months or a 3.5% increase year-on-year.

During its last policy meeting for 2015, the Monetary Board of the BSP maintained its key rates at 4.0% for overnight borrowing, 6.0% overnight lending and 2.5% for the Special Deposit Account (SDA) rate.

As expected, the US Federal Reserve finally raised its federal funds target rate to 0.25%- 0.5% from zero -0.25% previously. The Federal Open Market Committee (FOMC) noted that further rate increases will be gradual and will follow the pace of the economy. The FOMC expects the fed funds target rate to rise toward 1.5% and 2.5% by the end of 2016 and 2017, respectively.

Financial markets continue to face strong headwinds from rising U.S. interest rates, strong US dollar, global slowdown and the May Presidential elections. These could create continued volatility and uncertainty in the near term.
