INVESTMENT OBJECTIVE AND STRATEGY

UPBF aims to provide its participants an alternative long-term investment outlet through investments in high quality and credit worthy instruments such as Government Securities and Deposits, Negotiable Certificate of Deposits, and Non-Negotiable Certificate of Deposits with the UCPB and other banks. It also aims to surpass its benchmark which is the Bloomberg Philippine Sovereign Bond Index AI. This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UPBF is suitable only for investors who:
 - are willing to invest in other fixed income instrument (such as government securities, corporate bonds, etc.) and willing to accept some amount of risk on principal and earnings, with unlimited upside and downside on yields; and
 - wants to exceed the returns of a time deposit over the long term, and willing to accept the returns that are from time to time lower than time deposits;

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.
- Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities).
- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

OTHER DISCLOSURES

RELATED PARTY TRANSACTION

The Fund has deposits with the Bank Proper and with UCPB Savings Bank, a wholly-owned subsidiary of the Bank, amounting to P48k and P600k, respectively, which were approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

November inflation rose to 2.5% on higher prices of food, fuel and electricity. Despite an uptick in inflation, the BSP still kept its key rates unchanged. Its overnight lending and deposit rates remained steady at 3.5% and 2.5%, respectively.

Meanwhile, OFW remittances contracted in October by 2.8% to USD2.3 billion. For the 1st 10 months of the year, remittances grew by 3.1% to USD24.4 billion from USD23.7 billion in the same period last year.

As expected, the Fed raised interest rates by 25 basis points to 0.75% in December.

Minimal trades were seen in the local GS market as investors remain defensive, opting to stay in the short end of the curve, on growing concerns over rising interest rates, higher inflation and a weaker peso.
