INVESTMENT OBJECTIVE AND STRATEGY

UBF seeks to provide long-term capital appreciation and income by investing in a mix of equities and fixed income securities. It also aims to surpass its benchmark which is the composite return of the Philippine Stock Exchange Index and the Bloomberg Philippine Sovereign Bond Index AI. This should not be construed, however, as a guarantee of yield.

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UBF is suitable only for investors who:
 - have a risk profile of moderate based on the results of the accomplished Client Suitability Assessment Form;
 - are seeking a simple way to achieve a diversified holding of stocks and fixed-income investments; and
 - willing to accept moderate fluctuations in unit prices.

OUTLOOK AND STRATEGY

The PSEi gained by a mere 0.88% in December holding above the 6,800 level as foreigners continue to exit the market. The Fed's on-going tightening cycle, potential policy changes under a new U.S. administration, and a weak peso have all weighed down on the market. The PSEi ended the year with a slight loss of 1.6%.

We expect trading to be thin at the start of 2017 due to lack of fresh leads.
