#### INVESTMENT OBJECTIVE AND STRATEGY

UPBF aims to provide its participants an alternative long-term investment outlet through investments in high quality and credit worthy instruments such as Government Securities and Deposits, Negotiable Certificate of Deposits, and Non-Negotiable Certificate of Deposits with the UCPB and other banks. It also aims to surpass its benchmark which is the Bloomberg Philippine Sovereign Bond Index AI. This should not be construed, however, as a guarantee of yield.

#### CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UPBF is suitable only for investors who:
  - are willing to invest in other fixed income instrument (such as government securities, corporate bonds, etc.) and willing to accept some amount of risk on principal and earnings, with unlimited upside and downside on yields; and
  - wants to exceed the returns of a time deposit over the long term, and willing to accept the returns that are from time to time lower than time deposits;

#### KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.
- Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities).
- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

**OTHER DISCLOSURES**

**RELATED PARTY TRANSACTION**

The Fund has deposits with the Bank Proper amounting to P43k which was approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

**OUTLOOK AND STRATEGY**

February inflation rose to 3.3% the fastest pace in 27 months on higher petroleum prices and electricity rates but stays within the BSP's range of 3-4%.

As expected the FOMC hiked interest rates by 25 basis points and reiterated their view of having at least three interest rate increases this year. The Monetary Board opted to retain its overnight deposit facility and its borrowing and lending rates unchanged at 2.5%, 3.0% and 3.5%, respectively.

We saw the Philippine economy grew by 6.8% for 2016, the fastest pace since 2013 due to strong domestic demand. Given this, Fitch affirmed the country's long-term issuer default rating at BBB- with a positive outlook.

The Bureau of the Treasury has successfully raised Php 70bn worth of retail bonds with higher than expected coupon rate of 4.25% which encouraged investors to participate due to its tenor, minimum placement of Php5,000.00 and quarterly coupon payment.

We still prefer short term instruments over longer ones to minimize risks on a rising interest rate environment (i.e. not more than 5 years).
