INVESTMENT OBJECTIVE AND STRATEGY

US\$BF intends to achieve for its participants an alternative investment outlet through investments in high-quality and credit worthy US Dollar denominated fixed income instruments. It also aims to surpass its benchmark which is the JP Morgan Asia Credit Index (Composite). This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the US\$BF is suitable only for investors who:
 - have a risk profile of moderate based on the results of the accomplished Client Suitability Form;
 - are willing to dedicate a small portion of their portfolio, preferably excess funds, for long term dollar-denominated investments and wish to achieve a balance between income and capital growth; and
 - understands the significance of fluctuating unit prices and that any income/loss arising from market volatilities and price fluctuations is for client's account.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a deposit issuer's failure to pay principal and/or interest in a timely manner on deposit instruments.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

OUTLOOK AND STRATEGY

U.S. Treasury yields have risen since the middle of September and are now back to the recent highs established in July. Two factors may have pushed yields higher. First, signals coming from the Fed indicate that a rate hike before the end of the year is likely even if inflation continues to trend below 2%. Second, the initial optimism over Trump's fiscal expansion program has turned into frustration as the administration remains embroiled in controversy. Investors believe that the administration will have a difficult time advancing its fiscal agenda if its attention is focused elsewhere.
