### OTHER DISCLOSURES

#### RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper amounting to Php 6M, which were approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

#### OUTLOOK AND STRATEGY

The PSEi went up by 3.65% MoM to close by 7,921 pts for the month of March which was mainly driven by the appointment of Mr. Benjamin Diokno as the new BSP governor which was seen by the market as "pro-growth". In his first statement, he said that there are more room for a monetary easing and BSP could expedite the reduction of reserve requirements of banks. This was followed by Monetary Board keeping rates unchanged last March 21, following dovish statements from Fed.

Trading was also relatively light and remained within a tight range for the past few weeks as investors stayed on the side-lines on lack of market moving news. Even the slower than expected inflation print of 3.3% for March failed to excite markets as slowdown in inflation has probably already been priced in.

The PSEi may track regional market activity in the short term on the back of uncertainties surrounding the on-going US-China trade talks and slowing global growth concerns. Key levels remain at 7,600-8,200.
