*As a percentage of average daily NAV for the quarter valued at Php 650,258,172.03

INVESTMENT OBJECTIVE AND STRATEGY

UCMF seeks to prevent loss of income at all times by investing in deposits in local banks. It also aims to surpass its benchmark which is the 30 Day Special Savings Rate. This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UCMF is suitable only for investors who:
 - have a risk profile of conservative based on the results of the accomplished Client Suitability Assessment Form;
 - has an investment perspective which is short term in nature and willing to put all his/her/their money only in time deposits;
 - are willing to forego the higher long term returns generated by riskier investment; and
 - understands the risks of investing in products which are non-deposit, non-bank and with no recourse to the Bank.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a deposit issuer's failure to pay principal and/or interest in a timely manner on deposit instruments.
- Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
- Reinvestment Risk. This is associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of the funds are reinvested.

TBG strictly adheres to the investment outlets as stated in the Fund's Declaration of Trust. Exposure limits and asset allocation is closely monitored on a regular basis. All counterparties and investment outlets underwent thorough evaluation and accreditation in accordance with the Trust Manual of Operations, Policies and Guidelines.

- **THE UITF IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC)**
- **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS AND FLUCTUATIONS ONLY**
- **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE**

Lowest	1.30611632

STATISTICS

Volatility, Past 1 Year*	0.23%
Sharpe Ratio**	-0.10
Information Ratio***	-0.14

* Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time.

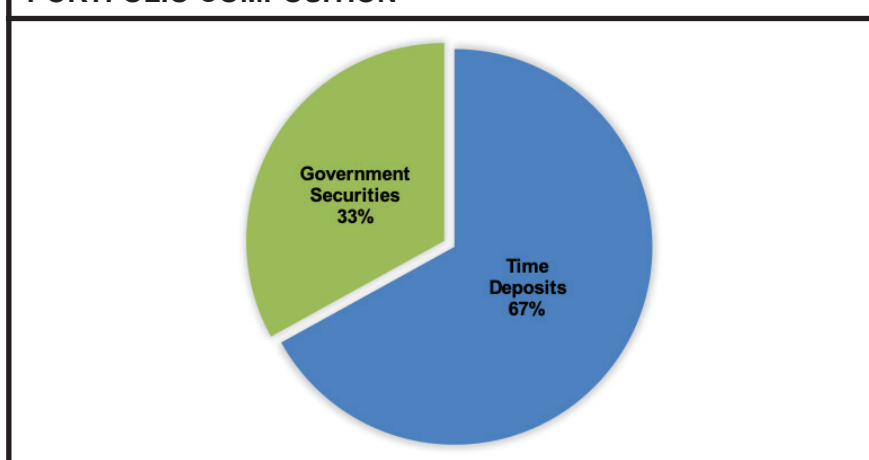

** Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

*** Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

OTHER DISCLOSURES

RELATED PARTY TRANSACTION

The Fund has deposits with the Bank Proper amounting to Php 938K, which were approved by the Board of Directors. Likewise, all related parties transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

Rates on government securities continued to decline. The 91-day, 182-day, and 364-day Treasury Bills for the end of June yielded to 4.46%, 4.76%, 4.97% from 5.30%, 5.57%, and 5.67% for the month of May, respectively. The downward pressure is due to less borrowing from the Bureau of Treasury and slower inflation rate expectation for this month. BSP Department of Economic Research said inflation will fall between 2.2% and 3.0%. While, inflation projection for 2019 and 2020 dropped to 2.7% (from 2.9%) and 3.0% (from 3.1%).

The cut of 50 basis points (bps) in the reserve requirement last June 28 resulted to a total of 150bps cut in the last 2 months. The last 50bps cut will take effect on July 26, bringing reserve requirement ratio to 16%. The 2% decrease in RRR from 18% will benefit banks as these deposits can be deployed to lending.
