INVESTMENT OBJECTIVE AND STRATEGY

UCMF seeks to prevent loss of income at all times by investing in deposits in local banks. It also aims to surpass its benchmark which is the 30 Day Special Savings Rate. This should not be construed, however, as a guarantee of yield.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her/their investment objective and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- the UCMF is suitable only for investors who:
 - have a risk profile of conservative based on the results of the accomplished Client Suitability Assessment Form;
 - has an investment perspective which is short term in nature and willing to put all his/her/their money only in time deposits;
 - are willing to forego the higher long term returns generated by riskier investment; and
 - understands the risks of investing in products which are non-deposit, non-bank and with no recourse to the Bank.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

OUTLOOK AND STRATEGY

Yields for 3-month, 6-month and 1yr Tbill were lower month-on-month. Market players favored 1-year bill as they lock in rates with a view that short-term rates will still stay low given BSP Governor Diokno's comments to lower down interest rates on year 2020.

Remittances hit 10-month high in October. It increased by 7.7% or equivalent to \$2.97 billion and may surpassed the Dec 2018 level by 2019 yearend. The 2019 budget was 99% released according to DBM. The exhaustion of 2019 budget will have trickle-down effect to the real economy. It will tend to have robust GDP. Rates will likely to remain low due to benign inflation and further BSP expansionary policy.
